

SQUARE Curtain Eyelets

DTP Supplies' range of square faced curtain eyelets are a new twist on the very popular fashion for eyelet headed curtains.

The square face of the eyelet will give curtains a really distinctive and classy look. The eyelet can be set square to the top of the curtain or, by turning the face of the eyelet 45 degrees, in a diamond style.

Available in our standard range of colours the square faced eyelet can be set using standard curtain eyelet machinery with a simple change

of setting tools. As the eyelet makes use of the existing round barrel of the standard round eyelet there is no need to purchase new cutting tools.

Don't forget that DTP Supplies also has an in house eyelet setting service and this extremely popular service is also available for the new style square eyelets.

Ask one of our skilled and knowledgeable sales advisors for a sample and further information.
