

# Hinge Handle

**NEW**

# A Boards in Minutes!

**With our new Hinge Handles you can make up an A board in minutes.**

They simply screw on to any graphics panels using a hinge and a handle combined. At 40cm wide, they can be used for any size panel up to 841mm. For internal or external use, they are reusable as many times as you wish and with a different graphic on the back, they can even be used in reverse, giving you two A boards for the price of one. Suitable for use with a wide variety of materials including mdf, plywood, foamex or acrylic.

A foot is also available to lift your A board off the floor. Suitable for material thicknesses between 12mm and 15mm.

Measure and drill holes

Press in fastener

Screw on Hinge Handle

Repeat on second panel

Ring to find out more!
