

## TREADLE OPERATED EYELETTING MACHINE

# RTP

This is a modern lightweight, treadle operated machine. The machine has a ratchet action that prevents the foot pedal being returned to the operator until a full stroke has been completed, ensuring a consistently accurate setting.

The machine comes on its own bench with the correct setting dies, and is ready for use as soon as it is received. It is capable of setting eyelets with hole up to 11mm when closed (26 Sail or 2 Grommet).

The machine is extremely versatile and with the correct setting dies it can be used to set a variety of fasteners.

DTP Supplies can also supply setting dies to suit your chosen fastener.

### Specification

Height	120cm
Weight	27Kg
Bench Dimensions	81 x 45 x 45cm
Throat Depth	100mm
Power Supply	N/A
